

# Build My Community Website in 7 Weeks

Hello and welcome to our new training programme to help you build a simple website.

## How this course will run

This is a weekly training course, on Wednesdays between 10am and 12pm on Zoom. Each week will be 2 hours long. Trainers will stay online for up to 30 minutes after the training to help if you want to keep working or ask more questions.

We may use digital products or online templates for learning. We will teach you how to use them, so do not worry if you have never used them before. Please bring a pen and paper if it helps you.

## Requirements

To take part you will need a laptop or computer device. This is very important for weeks 3, 4, 5 and 6, when you will be building your website.

We will set tasks for you to do after each training session: writing some information or finding photos for your website for example.

## Recordings

We may record the training so that you can watch them back in your own time. Recordings will not be shared publicly. Not all training will be recorded.

## Training materials

You will be writing your own webpages and uploading your own photos. However, we will also provide text and photos you can use for training purposes.

## Support

You can arrange one-to-one help with us on any of the topics, or if you cannot attend one of the weeks.

## Support after the training has finished

We cannot manage your website for you. However, we can help with technical problems and ongoing one-to-one training needs.

## Certificate

Although this is not an accredited course, we will send you an online or hard copy certificate of attendance on completion if you would like this.

## Modules

Our first three modules will help you plan and start writing pages for your website. You will join other participants building their websites at the same time. There will be time to share your ideas and learn from other people's experiences. You will apply for and familiarise yourself with Voice in week 3.

In weeks 4, 5 and 6 you will build your website. Our final module is a celebration and learning event.
