

Analysing your survey data - Advanced

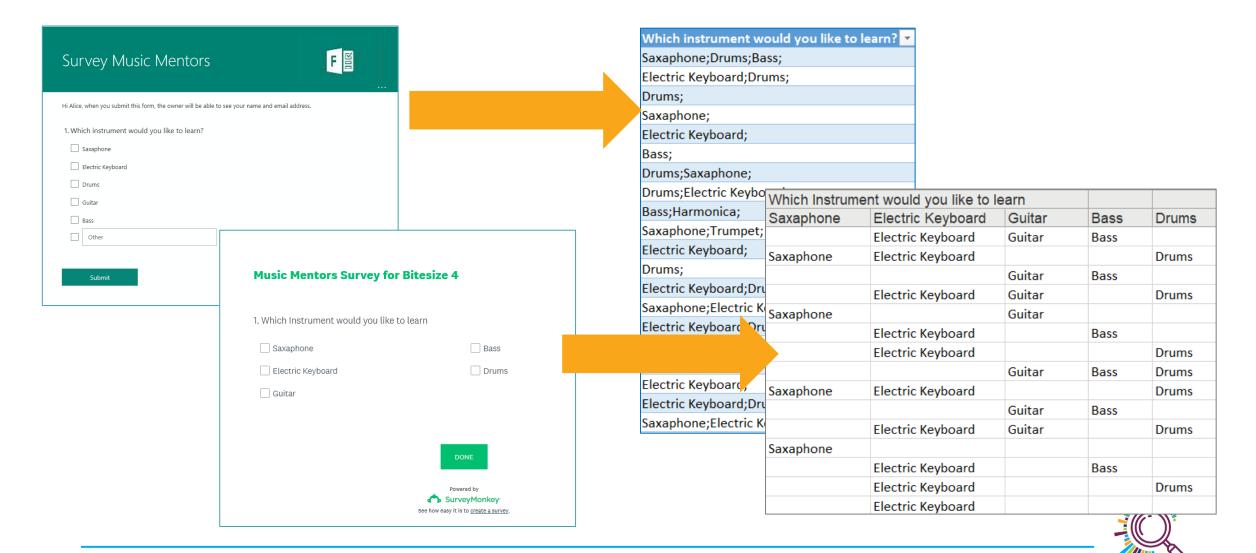

What we'll be covering

- ✓ Excel analysis pivot tables & charts refresher
- ✓ Multi select multiple choice questions
 - ✓ Total row, Text Filter, CountIf
 - ✓ Power Query / Get Transform
- ✓ Coding free text responses
- ✓ Xlookup
- ✓ Power Query
 - ✓ Connect & Append

Multiple Select Multiple Choice questions

Multiple choice exports

Microsoft Forms & Google Forms return multiple options selected in one column, separated by semi colons & commas respectively

✓ Survey Monkey returns multiple options across consecutive columns

Which instrument would you like t	o learn?
Saxaphone;Drums;Bass;

Get & Transform data

✓ The Power Query Editor in Excel has been rebranded Get & Transform data in 2016 and later versions

✓ If you're working with Excel 2010 or Excel 2013, you need to download and install the Power Query add-in.

https://www.microsoft.com/en-us/download/details.aspx?id=39379

But please note Microsoft are no longer updating this add-in so ideally you should upgrade.

What is a query & how do they work

A Microsoft Query is an **SQL SELECT Statement** which allows you to retrieve & transform data from different Excel worksheets and work books. You need to provide answers to the following questions to create a query:

- ✓ Where is that data located?
- ✓ What steps do you want to take to transform it?
- ✓ Where do you want to store the results?

1. Conduct a survey

Prison ID

HMP1234

HMP1 235

HMP1236

HMP1 237

HMP1238

HMP1239

HMP1240

HMP1 241

HMP1242

HMP1243

HMP1244

HMP1 245

HMP1246

HMP1247

HMP1248

HMP1249

HMP1250

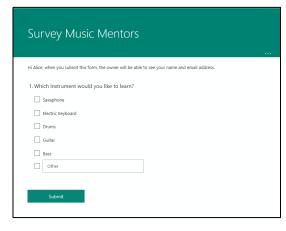

HMP1 251

HMP1 252

HMP1 253

HMP1254

Prison

2. Export to Excel

Vhich instrument would you like to learn?

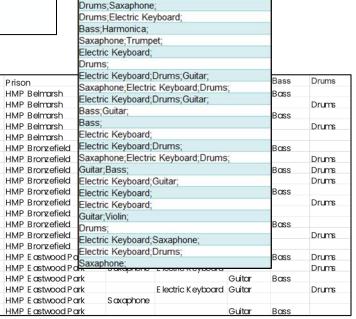

Saxaphone; Drums; Bass; Electric Keyboard; Drums;

Drums:

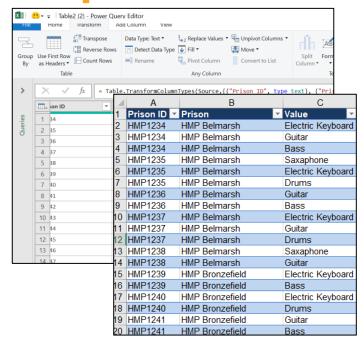

Bass:

Saxaphone:

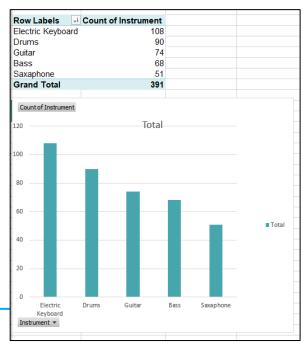

Electric Keyboard;

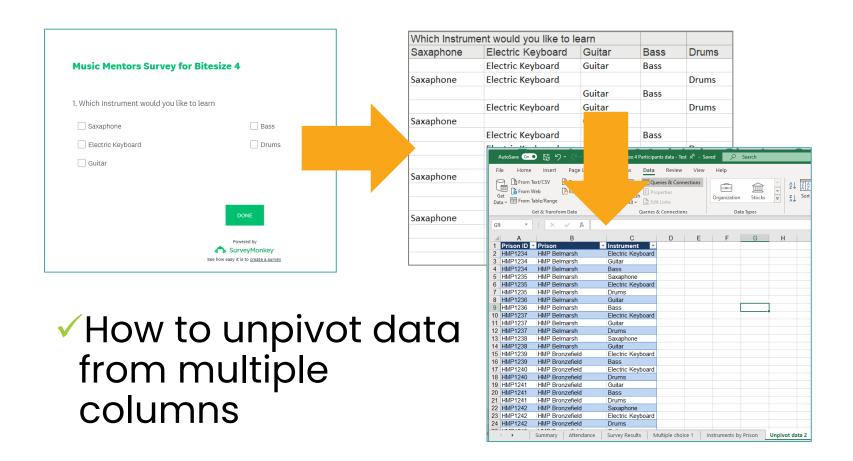

3. Unpivot the data

4. Create a Pivot table & chart

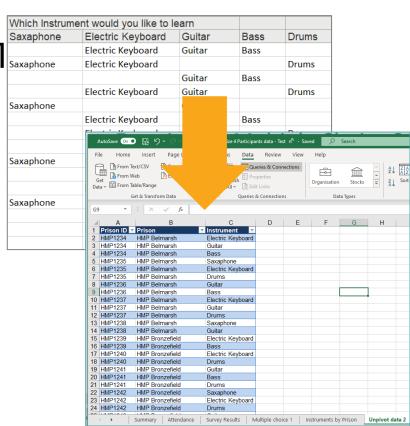

Unpivot Data – Method 1

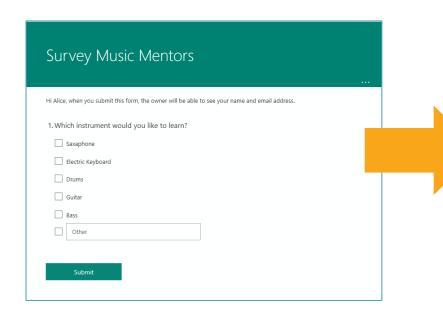

Unpivot data - Method 1 (tabular data)

- ✓On the Multiple Choice 1 sheet, make the data into a table & name it "Multiplechoice1 Saxaphone (Ctrl +T)
- ✓ Open the Power Query Editor (Data tab Get Data From Table/Range button)
- ✓ Unpivot the data (Highlight the columns to unpivot using the shift key-Transform tab-Unpivot data button)
- Remove) Remove) Remove) Remove the Attributes column (Right mouse click –
- ✓ Rename the Values column "Instrument" (Right mouse click-Rename)
- ✓ Upload & Close the query (Home tab Upload and Close)
- ✓ Rename the results worksheet "Unpivoted data 1"

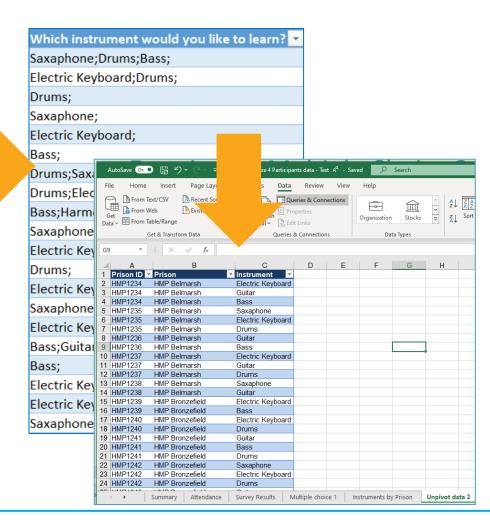

Unpivot Data – Method 2 (delimited)

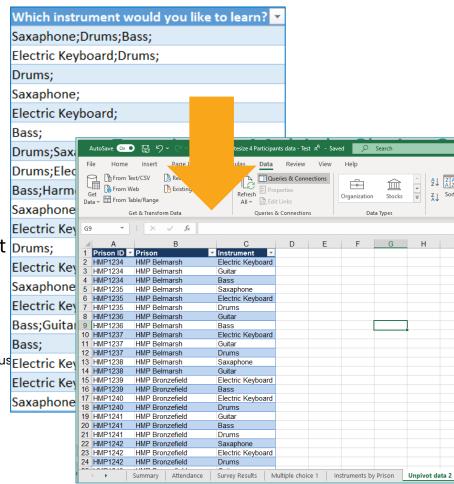

✓ How to unpivot data from multiple columns

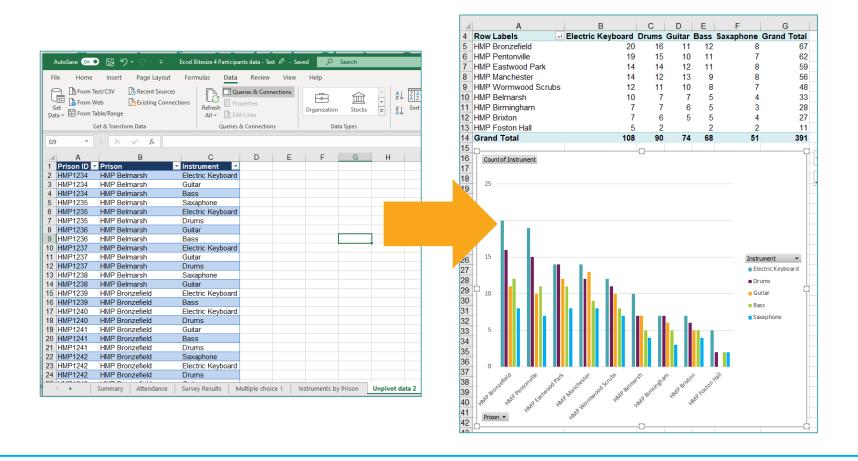

Unpivot data – Method 2 (delimited)

- ✓ Go to the Multiple Choice 2 worksheet
- ✓ Rename the Table "Unpivotdata2"
- ✓ Open the Power Query Editor (Data tab From Table/Range button)
- ✓ Split the data in the column (Home tab- Select column Split Column button-select ; as delineator)
- ✓ Unpivot the data (Highlight the columns to unpivot using the shift brums; key-Transform tab-Unpivot data button)
- ✓ Remove the Attributes column (Right mouse click Remove)
- Rename the Values column "Instrument" (Right mous Electric Key
- ✓ Filter out the blank rows (Filter on Values column deselect blanks)
- ✓ Upload & Close the Query (Home tab Upload and Close)
- ✓ Rename the results worksheet "Unpivoted data 2"

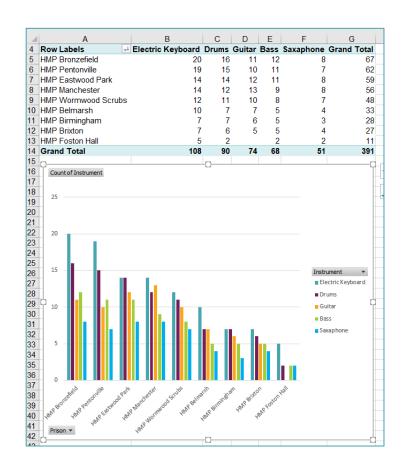

Creating a Pivot table & Column chart

Pivot table & Column chart

- ✓ Create a Pivot table in the **Unpivot data 1** worksheet (Click in the Table, Insert menu Pivot table)
- ✓ Rename the worksheet "Instruments"
- ✓ Add Instrument to the Rows & Prison ID to the Values field areas
- ✓ Add a chart (Click in the Pivot Table, PivotTable Analyse menu-Pivot Chart)
- ✓ Sort the results by SiZe (Arrow next to row column, More sort options Descending Count of Prison ID)
- ✓ Add Prison to the Columns field area
- ✓ Switch Instruments and Prisons between row and column (Pivot Table Design tab – Switch Row/Column)
- ✓ Sort the Prisons column by size (Arrow next to column header, More sort options-Descending-Count of Prison ID)
- ✓ Resize & move the chart to where you want it on the page (Click and drag on the corner to change the size)

Analysing Open Ended Questions

- ✓ Add a text box to your sheet to record notes
- ✓ Identify the key recurring themes
- Assign a numerical code to each theme e.g.1 = Instrument choice/availability
- ✓Go through all the answers assigning codes to each answer
- ✓ Add your coding to the text box so you can refer to it.

Open text questions

✓ How to code open or free text answers for analysis

What do you think would improve the sessions?
More instruments
Less people in the group, the mentors don't have enough time to spend with everyor
More drums & better heating in the winter & sessions at the weekend
Too much noise from the courtyard
Longer sessions
My welfare officer told me I couldn't attend them anymore
Weekly sessions, once a month isn't enough
The room we practice in is next to the rubbish bins, in summer it stinks and the keyb
More choice of instruments & a mentor who knows how to play drums
We need a piano!
The heating has broken again & could we get drums?
Why are there only 2 mentors? They are always busy with the beginners and never h
Freezing cold room - can you get the heating fixed
We should do a show in the school holidays so my kids can attend

What would improve the sessions?

- 1 = Number/availablity of Instruments
- 2 = Number/suitability/training of mentors
- 3 = Length/frequency of sessions
- 4 = Rehersal space
- 5 = Number/timing of performances
- 6= Other

Open text questions (part 1)

- ✓Put the data in the **Survey Results** tab into a Table & name it "OpenTextQuestions"
- ✓ Open the Power Query Editor (Data tab From Table/Range button)
- ✓ Select the columns to include in the query results: Prison ID, Prison, What do you think would improve the sessions?, Improvement areas (Home tab Choose Columns Select)
- ✓ Split the data in the Improvement Area column (Transform tab-Split Column button-By Number of characters)
- ✓ Unpivot the data (Highlight the columns to unpivot-Transform tab-Unpivot data button)
- ✓ Remove the Attributes column (Right mouse click in the column header Remove)
- ✓ Rename the Values column "Improvement areas" (Right mouse click in the column header Rename)
- ✓ Upload & Close the Query (Home tab Upload and Close)
- ✓ Use Find & Replace to replace the number codes with text (copy the text box from the survey sheet to make it quicker)

Creating a Pivot table & Pie chart (part 2)

- ✓ Create a Pivot table in the **Unpivoted data 3** Worksheet (Click in the Table, Insert menu Pivot table)
- ✓ Rename the new worksheet "Improvement areas"
- ✓ Add Improvement Area to the Rows & Prison ID to the Values field areas
- ✓ Add What do you think would Improve the sessions? To the Rows under Improvement Areas
- ✓ Use the + and on the Row to show/hide rows
- ✓ Sort the Pivot chart by number of people per row (Arrow next to row column, More sort options Descending Count of Prison ID)
- ✓ Add a pie chart (Click in the Pivot Table, PivotTable Analyse menu-Pivot Chart)
- ✓ Format the pie chart to show percentages (Click on pie chart, Design tab-select a format with percentages)
- ✓ Remove the field **Count of Prison ID** (Right click on the field in the chart Remove)
- ✓ Hide all field buttons (Right click on a field in the chart Select Hide All Field buttons)
- ✓ Rename the chart (Double click into the Title to type in a new heading)

Impact Aloud 2020 Evaluation

Impact Aloud 2020 Evaluation

Present survey headline results in engaging ways

There are some additional tools that can help

Datawrapper

missing social contact

Bringing data together with Power Query Part 1: Creating connection queries

- ☐ Create a query for Prison 1: Belmarsh (Data tab From data from Table/range)
- Close and Load to Connection (Home menu Close & load to connection only)
- Repeat for prisons 2 & 3

Bringing data together with Power Query Part 2: Appending queries

- ☐ Launch the Power Query Editor (Data tab Get data Launch Power Query Editor)
- Create an Append query (Home tab, select Append query as new, select all the tables, click on Add, rename the query to All participants, then Close and Load the query to create a new worksheet)

Bringing data together with Power Query Part 3: Adding data and refreshing queries

- Add a row to any of your 3 prison's worksheet for a new participant
- □ Refresh your query (Data tab Refresh All)

About Superhighways....

A programme of Kingston Voluntary Action, we provide digital, data & tech advice, support & training to the sector, including:

- Tech support
- ✓ Current training
- Training brochure
- Websites
- ✓ Digital, data & tech strategy
- Digital inclusion
- Digital / data consultancy
- ✓ <u>Datawise London</u>

Sign up to our newsletter for updates and new funded training offers

Thanks for listening
